Full Stack Developer

surajsangale.vercel.app

Navi Mumbai

[+91 703 95 29 129](tel:+917039529129)

PROFILE SUMMARY

- Full-Stack Developer with **4+ years** of experience building scalable, high performance - performance web applications.
- Experienced in developing modern web applications with **SSR, REST APIs, Redis caching, JWT Authentication, Socket.IO, SEO optimization**, and **responsive UI** development. Strong understanding of scalable architectures, reusable components, performance optimization, and Agile software development.
- Passionate about creating user-centric applications with clean code, excellent performance, and maintainable architecture.

TECHNICAL SKILLS

- | | |
|--------------------|---------------------|
| ✓ JavaScript | ✓ Next.js, React.js |
| ✓ Python | ✓ Node.js |
| ✓ MariaDB | ✓ AWS CI/CD |
| ✓ Redux | ✓ TypeScript |
| ✓ React Native | ✓ MongoDB |
| ✓ Strapi | ✓ Socket IO |
| ✓ SEO Optimization | ✓ Redis |

EXPERIENCE

Fortune4 Technologies | Software Developer | 02/2024 - PRESENT

Working as a Full Stack Developer building scalable e-commerce applications using Next.js and Node.js while collaborating with cross-functional teams in Agile environments.

Projects:

1. Titan Eye Plus & Fastrack Eyewear -

- Developed scalable e-commerce applications using **Next.js and Node.js** in a **mono-repo** architecture.
- Integrated Magento services and backend APIs.
- Managed application state efficiently using **Context API**.

- Improved Web Vitals including **LCP, CLS and INP** through **Redis caching** and frontend optimization.
- Optimized application performance by implementing **lazy loading, code splitting,** and efficient state management.
- Wrote automation scripts for API testing.
- Participated in requirement gathering, code reviews, deployment and production support.
- Followed clean architecture and coding best practices.

2. Runway Sunglasses

- Built a modern **SSR** web application using **Next.js, Node.js** and **MariaDB**.
- Implemented **Redis caching** to improve application performance.
- Optimized **SEO** and Core Web Vitals.
- Developed responsive user interfaces for desktop and mobile devices.

3. Frame Expert

- Integrated **Video input** for real-time face scanning.
- Developed barcode scanning functionality.
- Integrated **Salesforce** and **SAP APIs**.
- Improved application performance and user experience.

Boppo Technologies | Frontend Developer | 07/2022 – 12/2023

Worked on React.js and Next.js applications while following Agile methodologies and collaborating with backend developers.

Key Projects:

1. Bollywood MDB

- Developed responsive and mobile-friendly news feed features using **React.js**, ensuring a seamless user experience across devices.
- Integrated **REST APIs** to fetch and display real-time movie news, celebrity updates, and entertainment content.
- Collaborated with **cross-functional teams**, including designers and backend developers, to deliver new features on schedule.
- Fixed frontend bugs, resolved UI inconsistencies, and improved overall application stability.
- **Enhanced page load speed by optimizing images**, API calls, and component rendering.
- Used **Git** for version control and collaborated with the development team through feature branching and pull requests.

- Tested and debugged features across multiple browsers to ensure cross-browser compatibility.

2. Insight GURU

- Developed a **student examination platform** and an **Admin Dashboard** using **React.js**, **Material-UI**, enabling organizations to efficiently manage online exams.
- Integrated **Java-based REST APIs** to fetch, manage, and display examination data seamlessly.
- Implemented **Redux Saga** for centralized state management, handling asynchronous operations and ensuring smooth data flow across the application.
- Enhanced application **usability, responsiveness, and overall user experience** by optimizing UI performance and ensuring cross-device compatibility.
- Worked in an **Agile/Scrum** environment, actively participating in sprint planning, daily stand-ups, and code reviews.

PERSONAL PROJECTS

1. Sports Tournament Management System - board.mardanisportsindia.org/

- Built a real-time sports tournament management platform.
- Developed live scoreboards synchronized across multiple referee devices.
- Implemented WebSocket communication using **Socket.IO**.
- Built secure authentication using **JWT**.
- Developed SSR frontend for improved **SEO** and performance.
- Managed tournament history, referee management and scoring system.

2. CargoDesk - cargodesk.vercel.app

- Built transport management software for logistics operations.
- Implemented Bulk **SMS** using **the Twilio API**.
- Developed contact management with **Google Contacts API**, CSV and vCard import.
- Integrated **Redis** caching to improve application performance, reduce database load, and optimize API response times.
- Designed and managed **MariaDB databases**, including schema design, complex queries, indexing, and performance optimization for efficient data retrieval.
- Designed responsive dashboards using Material UI and Tailwind CSS.

3. Linux Tools - linux-support-manager.vercel.app

Developed a productivity toolkit for DevOps Engineers featuring:

- DNS Checker
- Port Scanner

- IP Lookup
- Linux Command Library
- JSON Formatter
- Text Comparator
- Server Diagnostics

4. Tic Tac Toe Game - playtictac.vercel.app

- Developed real-time multiplayer gameplay using **Socket.IO**.
- Implemented **AI-based** single-player mode.
- Built room-based matchmaking.
- Designed responsive **glass-morphism UI**.
- Created reusable animated components.

QUALIFICATIONS

- **B.E – Electronics and Telecommunication** – Mumbai University
CGPA - 7.35
May 2022
- **HSC – Maharashtra State Board**
56.31%
March 2017

ACHIEVEMENTS

- Developed multiple production-grade applications for Titan Eye Plus and Fastrack.
- Built real-time applications using **Socket.IO**.
- Improved application performance using **Redis caching**.
- Developed **SEO-friendly SSR** applications with Next.js.
- Delivered scalable enterprise-level web applications.
- **Achieved a 95+ Google Lighthouse Performance/Web Vitals score** by optimizing Core Web Vitals (LCP, CLS, and INP), implementing Redis caching, lazy loading, code splitting, and other frontend performance best practices.
